- YOUTH IN CLIMATE CHANGE FORUM
- IRP2 PRESENTATION
- 03 December 2010

The process

- **Participation**
- **Top to bottom process**
- **More into profit than people centred**
- **The cost of IRP2010**
- **The marginalized will be negatively affected by the rising cost of ENERGY**

Environmental impact

- Promotes coal and nuclear energy
- The process does not address climate change issues as it continues with excessive emissions.
- Promoting Coal and Nuclear as a solution to our energy problem

Conclusion

- Renewable energy technologies should be provided to all citizens, towards achieving South Africa’s goal to a low carbon economy.
- Energy efficiency measures must be compulsory in new developments;
- Free basic electricity-A better life for all

- THANKS
