

The process

- Participation
 - Top to bottom process
- More into profit than people centred
 - The cost of IRP2010
- The marginalized will be negatively affected by the rising cost of ENERGY

Environmental impact

- Promotes coal and nuclear energy
- The process does not address climate change issues as it continues with excessive emissions.
- Promoting Coal and Nuclear as a solution to our energy problem

Conclusion

- Renewable energy technologies should be provided to all citizens, towards achieving South Africa's goal to a low carbon economy.
- Energy efficiency measures must be compulsory in new developments;
- Free basic electricity-A better life for all
