Memorandum from the Parliamentary Office

National Assembly Question : 206

206. Ms E N Louw (EFF) to ask the Minister of Energy:

Apart from ongoing promises about the construction of seemingly unsustainable and perceived potentially dangerous power stations and the dependence of the country on finite coal resources for power, what plans does she have to move the country into a more sustainable and ecologically sound energy regime? NO1687E

Reply:

The Integrated Resource Plan (IRP) spells out in detail the government's plans to ensure a sustainable and ecologically sound energy regime. The Plan is available on the Departmental website.
