

GOVERNMENT NEWS

Let's grow South Africa together

WE ARE STILL AT GREAT RISK OF COVID-19: VACCINATE NOW!

- Government has started to notice a continuous rise in daily infections mainly in Gauteng, Kwazulu-Natal and Western Cape.
- With the fifth wave approaching, we are still at great risk of COVID-19, especially as we go into winter which is associated with cold and flu- with symptoms similar to those of COVID-19.
- We urge all those who are still not vaccinated to come forward and take a life-saving jab.
- We also encourage all those who qualify for booster shots to vaccinate before deep winter.
- Simply present yourself at a vaccination site, with or without an appointment, you will be registered and vaccinated onsite.
- Vaccines work to enable long life for all, vaccinate now and save your life!
- COVID-19 remains a threatening disease and we cannot afford to lower our guard.
- Remember to always wash up, mask up, keep a social distance and open windows for fresh air.
- To locate a vaccination site near you visit: <https://sacoronavirus.co.za/active-vaccination-sites/>
