COVID-19 VACCINATION

- Getting the COVID-19 vaccine is now more urgent than ever because of the Omicron variant and the expected 4th wave.
- Make sure everyone in your family that are 12-years and older are vaccinated.
- Vaccines are safe and save lives.
- The more people we have vaccinated, the less chance the virus has of mutating.
- Remember to observe all safety protocols- mask up, wash up, move up, and be in well ventilated areas.
- Vooma Vaccination week will take place between 3-10 December . Make your way to a vaccine site to get your jab.
- Only our actions and choosing to vaccinate can stop what happens now.
- A list of the vooma vaccine sites can be accessed at: <https://sacoronavirus.co.za/vooma-vaccination-weekend/>
