

# GOVERNMENT NEWS

Let's grow South Africa together

## VACCINATION

- Vaccination continues to be the country's best defence against Covid-19 in the absence of any cure.
- As schools re-open, government encourages young people to take the COVID-19 vaccine to improve their protection from infection.
- COVID-19 vaccines also help children and adults from getting seriously ill even if they do get COVID-19.
- Children aged 12-17 can get the second Pfizer dose 42 days after the first dose.
- There are enough vaccines in the country, you only need to present yourself to a vaccination site near you for your first jab or your booster shot.
- We must not be fooled by the declining rate of infection and let our guard down, COVID-19 is real and continues to claim lives.
- The more we vaccinate, the safer we will be!
