

The Project Title	Project Description	
Springbok Grid Connected 55.5 MW Wind Farm, South Africa	<p>The proposed project envisages the construction and operation of a wind farm with installed capacity of up to 55.5 MW. The wind farm will be comprised of up to 37 wind turbine generators and the associated infrastructure. Produced electricity will be supplied to the Eskom electricity network.</p> <p>The wind turbines capture the kinetic energy of the wind to drive a generator located within the wind turbine where this energy is subsequently converted into electricity.</p> <p>The proposed project activity will reduce greenhouse gas emissions by 128 733 (tCO₂e) per annum, over a crediting period of 10 years.</p>
