Explanatory Notes.

Table 1:

1. Data on the petrol retail price was provided by the Department of Minerals and Energy (DME).
2. ULP = Unleaded Petrol.
3. On 1 January 1989 98 Octane changed to 97 Octane.
4. 87 Octane has been discontinued and replaced by ULP 91.
5. As from 3 May 2000, 91 octane ULP will be replaced by 93 octane ULP in the interior. The pump prices of 93 octane leaded and 93 octane unleaded will be the same.

Figure 1:

1. The real price was calculated by using the monthly CPI (see Table 22).

Explanatory Notes.

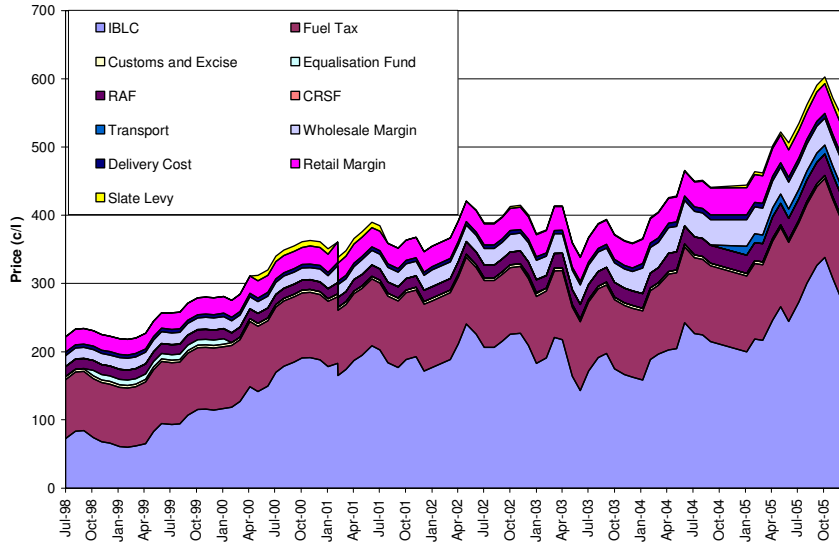

Table 2:

1. Price component data was provided by the Department of Minerals and Energy (DME).
2. IBLC (col. 1) = In-bond landed cost.
3. RAF (col. 5) = Road Accident Fund.
4. CRSF (col. 6) = Central Road Safety Fund. An amount of 0.2 c/l was allocated to this fund from 12/11/1990 to 03/04/1996.
5. Transport (col. 7) is for transporting product from the refinery to the depot (at the coast). A further amount of 11 c/l is applicable when the product is sold in Gauteng.
6. On 3 May 2000 a 8.0c/l Slate subsidy (col. 11) was implemented to finance the cumulative over/under recovery account of the local oil industry, which had a negative balance of R1 142,850 million as at the end of March 2000.
7. The DME has approved the termination of the ad-hoc slate levy with effect from 1 August 2001.

Figure 2a:

1. The amount for the CRSF and transport (cols. 6 and 7 of Table 2) are too small to show on this graph.

Explanatory Notes.

Table 3:

1. Data was provided by the Department of Minerals and Energy (DME).
2. Low duty and Middle duty prices were withdrawn on 1 July 1987. Low duty prices were re-introduced on 1 November 1987 for farming and forestry. Column 4 for the period 1/11/1987 to 15/7/1989 relates to fuel for forestry activities.
3. Low Duty prices were discontinued from 12 March 1997.
4. As from March 1998 the wholesale price of Diesel but not the retail price is regulated.
5. Diesel Grades: With effect from 2 Jan 2002 the current 0.5% sulphur content diesel grade will be replaced by a 0.3% sulphur content diesel grade.

Figure 3:

1. The real price was calculated by using the monthly CPI (see Table 22).

Explanatory Notes.

Table 4:

- Price component data was provided by the Department of Minerals and Energy (DME).
- IBLC (col. 1) = In-bond landed cost.
- RAF (col. 5) = Road Accident Fund.
- CRSF (col. 6) = Central Road Safety Fund. An amount of 0.2 c/l was allocated to this fund from 12/11/1990 to 03/04/1996.
- Transport (col. 7) is for transporting product from the refinery to the depot (at the coast). A further amount of 10 c/l is applicable when the product is sold in Gauteng.
- As from March 1998 the wholesale price of Diesel but not the retail price is regulated.
- On 3 May 2000 a 8.0c/l Slate subsidy (col. 11) was implemented to finance the cumulative over/under recovery account of the local oil industry, which had a negative balance of R1 142,850 million as at the end of March 2000.
- The RAF levy on DIESEL increased with 6.2 c/l with effect from 4 July 2001. The increase coincides with the reimplemention of a Diesel refund system on Diesel to a number of economic sectors, e.g. the Agricultural and Mining sectors.
- The DME has approved the termination of the ad-hoc slate levy with effect from 1 August 2001.
- Diesel Grades: With effect from 2 Jan 2002 the current 0.5% sulphur content diesel grade will be replaced by a 0.3% sulphur content diesel grade.

Figure 4a:

- The amount for the CRSF and transport (columns 6 and 7 of Table 4) are too small to show on this graph.

2005/12/07	378.20	85.72	428.60	400.60	89.56	447.80

Explanatory Notes.

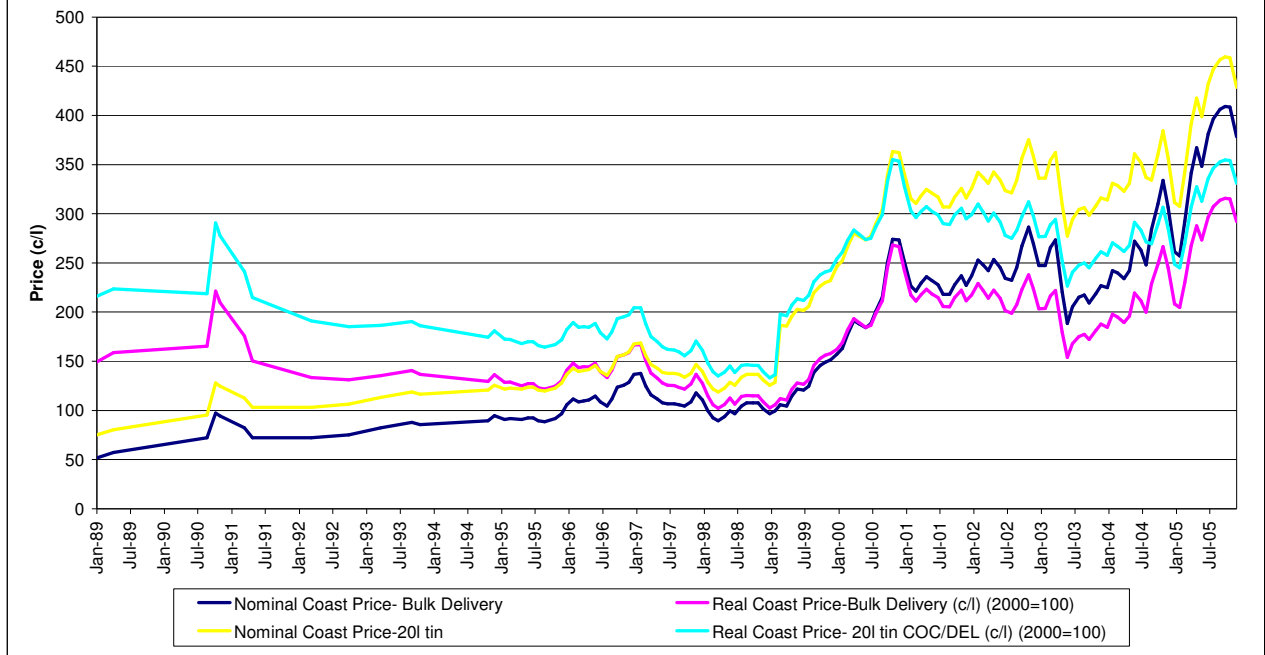

Table 5:

1. Data was provided by SAPIA and the Department of Minerals and Energy (DME).
2. COC = Customer Own Collection.
3. The bulk prices are list prices and exclude a controlled maximum retail margin of 33.3%.
4. The prices are exclusive of VAT.

Figure 5:

1. The real price was calculated by using the monthly CPI (see Table 22) with 2000 = 100.

Explanatory Notes.

Table 7:

- 1. Prices are for the Regulated Maximum Refinery Gate Price
- 2. Data was provided by CEF Pty Ltd

Figure 7:

- 1. The real price was calculated by using the monthly CPI (see table 22) with 2000=100

Explanatory Notes.

Table 9:

1. This table gives comparative prices for selected liquid fuels in nominal prices based on cost per energy unit. Conversion factors are given in Table 25.
2. Prices have been calculated on a monthly basis.
3. Prices for petrol (Column 1), IP (Column 2) are based on small pack prices which have been identified as being applicable to domestic users.
4. Prices for HFO (Column 3), Diesel (Column 4), IP (Column 5) are based on bulk delivery prices and which have been identified as being applicable to business users.

Explanatory Notes.

Table 11:

1. This table gives FOB prices for Mogas and Diesel at Singapore in columns 1 and 5 and 2 and 6 respectively.

The price has been converted from US\$/gal to SA c/l. The prices were provided by CEF and are based on the formula used to calculate the IBL. The FOB price is calculated as follows:

* 80% posted (from Caltex, Bahrain and 3 refineries in Singapore).

* 20% spot (from Singapore).

2. Prices for Brent and Dubai crude in US\$/barrel.

Prices for January 1995 to December 1997 were taken from SAPIA Third Annual Report - October 1998.

Prices for January 1998 to April 2002 were obtained from CEF. DTD BRENT Monthly Average and DUBAI First Line Monthly Average.

Explanatory Notes.

Table 12:

1. This table gives the price of Dubai crude(First Line Average) ; Mogas FOB and the South African In-bond-landed cost for Mogas in SA cents per litre. All prices are nominal values.

Figure 12:

1. This graph shows the prices of the three components of Table 12.

Explanatory Notes.

Table 13:

1. Values for average local and export nominal and real cost prices for bituminous and anthracite are from the Minerals Bureau.
2. The real price was calculated by using the annual CPI (see Table 22) with 2000 = 100.
3. The prices are exclusive of VAT.
4. 2002 data - 2 month average

Explanatory Notes.

Table 15

1. This table indicates the price of Sasol gas (previously Gascor).
2. From 25/01/1994 the tariff structure changed from seven fixed rates to a lower and higher rate with a formula for determining prices between the two extremes.
3. The tariffs are as follows:

	Combined load factor (C)	Tariff (R/GJ)
Effective 25/01/1994	90% and more	R 11.87
	40 % and more but less than 90%	$R/GJ = 1560/C \wedge 1.084$
	Less than 40%	R 30.76
Effective 27/12/1994	90% and more	R 12.35
	40 % and more but less than 90%	$R/GJ = 1622/C \wedge 1.084$
	Less than 40%	R 31.99
Effective 26/01/1996	90% and more	R 13.03
	40 % and more but less than 90%	$R/GJ = 1711/C \wedge 1.084$
	Less than 40%	R 33.75
Effective 26/09/1996	90% and more	R 14.33
	40 % and more but less than 90%	$R/GJ = 1882/C \wedge 1.084$
	Less than 40%	R 37.13
Effective 26/07/1997	90% and more	R 15.69
	40 % and more but less than 90%	$R/GJ = 2061/C \wedge 1.084$
	Less than 40%	R 40.66
Effective 26/01/1998	90% and more	R 17.10
	40 % and more but less than 90%	$R/GJ = 2246/C \wedge 1.084$
	Less than 40%	R 44.32

4. The lowest tariff has been considered to be Tariff A and the highest Tariff G.
5. These tariffs are exclusive of VAT.
6. During 1998 and 1999 Sasol has progressively been converting their customers to a volume based, market driven pricing structure. Instead of a load factor based sliding scale, they now have volume based market segmentation with declining block prices and volume categories. The price changes on a monthly basis.
7. The prices given (as from February 1998) are Sasol's minimum and maximum list prices and do not reflect discounts in the market place.

Figure 15

1. Tariffs A and G are graphed in both nominal and real prices.
2. The real price was calculated by using the monthly CPI (see Table 22) with 2000 = 100.

Table 16

1. The data in this table is from various Eskom Statistical Yearbooks and Annual Reports.
2. The price data in this table is only applicable to Eskom's direct sales to the categories as listed. Sales by local authorities to the Domestic, Commercial and Industry categories are not included in this table. Some data on prices for electricity sold by local authorities is given in Table 18.
3. The volumes are c/kWh for each of a number of sales categories.
4. The real price was calculated by using the annual CPI (see Table 22) with 2000 = 100.
5. Eskom noted a change in data format for Domestic and Street lighting for 1993.
6. Prices are exclusive of VAT.

Explanatory Notes.

Table 17

1. Data in this table was provided by the National Electricity Regulator.
 2. Eskom data is excluded from this table.
 3. The average weighted price paid by commercial, industrial and residential customers in each of the nine provinces is tabulated.
 4. The prices are exclusive of VAT.
 5. The average prices for 2000 up to 2006 were not available for this publication and will be included in the next publication.

Explanatory Notes.

Table 18

1. This table gives Eskom's domestic tariff structure.
 2. Columns 1 and 2 refer to normal C tariff customers (Now called "Homepower"). There is a basic charge (col. 1) in Rands per month and an energy charge (col. 2) in c/kWh.
 3. The S-tariffs are valid for pre-paid meters (Now called "Homelight"). The different tariffs refer to the different ratios of investment between Eskom and the customer.
 4. Columns 3 and 4 indicate unit (kWh) prices for Tariff C customers given a consumption of 500 kWh/month and 1000 kWh/month respectively. This takes the basic and the energy charges into account.
 5. Columns 10 to 17 gives the same information in R/GJ.
 6. The S1 and S2 tariffs are based on 20 amp and 60 amp supply.
 7. The tariffs are exclusive of VAT.
 8. Homelight 1, 2.5A was in a pilot study stage in 2001.
2002 (1) tariffs for January 2002 to end June 2002.
2002(2) restructuring of all Eskom tariffs - will be implemented on 1 July 2002.

Explanatory Notes.

Table 19

- All price data is from Statistics South Africa (used to be the Central Statistical Service (CSS)).
- Wholesale prices for coal and electricity are from the Producer Price report.
- Retail prices are from the Retail Price report (Statistical Release P0141.3)
- The real prices were calculated by using the annual CPI (see Table 22) with 1995 = 100.
- The original prices for retail coal (col. 3) are as follows:
 - 1965 - 1990: c/90kg
 - 1991 - 1993: c/40kg
 - 1994 - 1996: c/70kg
 All the retail coal data was converted to c/kg to ensure uniformity.
- The original prices for retail firewood (col. 4) are as follows:
 - 1965 - 1990: c/45kg
 - 1991 - 1993: c/20kg
 - 1994 - 1996: c/40kg
 All the retail firewood data was converted to c/kg to ensure uniformity.
- The wholesale prices for coal and electricity for 1995 and 1996 were calculated by using the 1994 prices and the Production Price Indices of June 1994, June 1995 (=100) and June 1996.
- The Retail Price Report (Statistical Release P0141.3) was discontinued by Statistics SA in 1997

Explanatory Notes.

Table 22a

1. This table gives the Consumer Price Index (CPI) on an annual basis.
2. The 2001 Annual CPI value is an eight month average
3. The data source is the South African Reserve Bank Quarterly Bulletin and Statistics South Africa.

Table 22b

1. This table gives the Consumer Price Index (CPI) on a monthly basis.
 - 1960 - 2000 at the base 1995=100
 - 2001 at the base 2000=100
 2. **ADJUSTMENT OF THE BASE PERIOD OF CPI TO 2000 = 100.**

Following international practice, the base year of CPI has been changed from 1995=100 to 2000=100 with effect from FEBRUARY 2001.
To convert any index from the previous base 1995=100 series to the base 2000=100, it should be divided by the conversion factor 1.381 (Headline inflation only)
Individual conversion factors for commodities and services are available in the statistical release P0141.4 from Statistics South Africa.
 3. The data source is the South African Reserve Bank Quarterly Bulletin and Statistics South Africa.

Explanatory Notes.

Table 23a

1. This table gives the Production Price Index (PPI) (1995=100) on an annual basis.
2. The 2001 PPI annual value is an eight month average.
3. The data source is the South African Reserve Bank Quarterly Bulletin and Statistics SA.

Table 23b

1. This table gives the Production Price Index (PPI) on a monthly basis.
 - 1961-2000 at the base 1995=100
 - 2001 at the base 2000=100
 2. **ADJUSTMENT OF THE BASE PERIOD OF PPI TO 2000=100**

Following international practice, the base year of PPI has been changed from June 1995=100 to 2000=100 with effect from FEBRUARY 2001.

To convert the index from the previous base 1995=100 series to the base 2000=100, it should be divided by the conversion factor 1.365 (PPI - All Commodities only)

Individual conversion factors for commodities and services are available in the statistical release P0142.4 from Statistics South Africa.
 3. The data source is the South African Reserve Bank Quarterly Bulletin and Statistics SA.

Explanatory Notes.

Table 24a

1. This table gives the weighted average exchange rate on an annual basis.
2. The data source is the South African Reserve Bank Quarterly Bulletin.
3. The units are SA c/US\$.

Table 24b

1. This table gives the weighted average exchange rate on a monthly basis.
2. The data source is the South African Reserve Bank Quarterly Bulletin.
3. The units are SA c/US\$.

REPORT 25

GENERAL RELATED INFORMATION

**Calorific Values of Fuels
from Price Report MAY 2002**

Table 25
CALORIFIC VALUES OF FUELS

Fuel	CV	Units	Density	Fuel	CV	Units	Density
Electricity	3.6	MJ/kWh		Coal (General purpose)	24.3	MJ/kg	
Natural Gas (varies according to composition)	41	MJ/m ³		Coal (Coking)	30.1	MJ/kg	
LPG (Liquefied Petroleum Gas)	26.7	MJ/l	0.541	Coke	27.9	MJ/kg	
Petrol	34.2	MJ/l	0.723	Coke oven gas	17.3	MJ/m ³	
Avgas	33.9	MJ/l	0.73	Blast furnace gas	3.1	MJ/m ³	
Illuminating Paraffin	37	MJ/l	0.788	Bagasse (wet)	7	MJ/kg	
Power Paraffin	37.5	MJ/l	0.813	Bagasse fibre (dry)	14	MJ/kg	
Jet Fuel	34.3	MJ/l	0.793	Biomass (wood dry typical)	17	MJ/kg	
Diesel	38.1	MJ/l	0.839	Coal gas (Sasol)	18	MJ/m ³	
HFO (Heavy Furnace Oil)	41.6	MJ/l	0.984	Coal gas (Sasol - methane rich)	35	MJ/m ³	
Coal (Eskom - average 1994)	20.1	MJ/kg					

Explanatory Notes:

(1) This table gives the average calorific values for fuels as used in the previous Price Report (2002)

(2) The data sources are varied but in general:

- a) Oil from Caltex
- b) Coal from Minerals Bureau and Eskom data
- c) Gases from Sasol Gas and Iscor
- d) Bagasse from the sugar industry
- e) Biomass from DME
