DISCLAIMER

While the Department endeavoured to incorporate all relevant and accessible beneficiators actively engaged in the Republic of South Africa, other players in the industry who we omitted are invited to submit their respective profiles for inclusion in the future publication. The review of the directory will be done on a continuous basis, as when the information becomes available.

FOREWORD

This is the sixth edition of the Directory of South African Minerals Beneficiators, intended to provide coverage of the mineral beneficiation industry that contributes to the growth of the economy of South Africa. Primary Steel & Stainless Steel producers and Titanium Dioxide Pigment Producer have been added into this Directory. Information on the South Africa's Ferrous Minerals, Ferroalloys and Non-ferrous producers can be found in the, D8: Ferrous Mineral Commodities Directory, H1: South African Ferroalloys Handbook and D10: Producers of Non-Ferrous Metals in South Africa respectively. This directory is looking at further downstream beneficiation and what has not been covered in the above-mentioned directories.

Through the Directory of South African Minerals Beneficiators the Department aims to create a database of beneficiators in appreciation of their contribution to the mineral industry of South Africa. The directory is also used as a marketing tool for Beneficiators and is circulated at various investment promotion activities.

March 2025

SECTION 1

1.1 AUTOCATALYTIC CONVERTERS/COMPONENTS

COMPANY NAME	CONTACT DETAILS	PROVINCE	NATURE OF BUSINESS	PRODUCT DESCRIPTION
CANNERS + ASSEMBLY				
<p>BENTELER SOUTH AFRICA (PTY) LTD Physical Address: Nelson Mandela Bay Logistics Park Erf 2051 Jagtervlakte Uitenhage, 6230</p> <p>Postal Address: P.O Box 127 Despatch 6220</p>	<p>Contact Person: Anthony Walsh Position: Commercial Director Tel: 041 996 5000 Email: anthony.walsh@benteler.com</p>	Eastern Cape	<p>Manufacture chassis systems, structural components and engine and exhaust systems chassis systems, exhaust and engine systems</p>	<p>Exhaust and engine systems</p>

SECTION 3

ENERGY MINERALS BENEFICIATION (COAL BENEFICIATORS)

3.1 ESKOM COAL-FIRED POWER STATIONS (ELECTRICITY GENERATION)

COMPANY NAME	CONTACT DETAILS	PROVINCE	TECHNICAL DETAILS
ARNOT POWER STATION Approximately 50km east of Middelburg in Mpumalanga	Tel: 013 297 9111	Mpumalanga	<ul style="list-style-type: none"> • Six 350 MW units • Installed capacity: 2 100 MW • 2001 capacity: 1 980 MW • Design efficiency at rated turbine maximum continuous rating (MCR) (%): 35.60% • Ramp rate: 34.48% per hour • Average availability over last 3 years: 92.07% • Average production over last 3 years: 9 675 GWh
CAMDEN POWER STATION Camden is approximately 15km's from Ermelo	Tel:017 827 8000	Mpumalanga	<ul style="list-style-type: none"> • Total station electrical capacity 1 600 MW • Total boiler capacity 1 814,4 kg/sec • Total circulating water capacity 73,242 m3/sec • Station efficiency: ± 32,0%
DUVHA POWER STATION Approximately 15km east of Witbank in Mpumalanga	Tel: 013 690-0111	Mpumalanga	<ul style="list-style-type: none"> • Six 600MW units Installed capacity: 3 600 MW • 2001 capacity: 3 450 MW • Design efficiency at rated turbine MCR (%): 37.6% • Ramp rate: 40% per hour • Average availability over last 3 years: 89.85% • Average production over last 3 years: 22 798 GWh
GROOTVLEI POWER STATION The station is situated close to the town of Balfour in Mpumalanga	Tel: 017 779 8500/017 779 0161	Mpumalanga	<ul style="list-style-type: none"> • Six 200MW units • Installed capacity: 1 200 MW • Design efficiency at rated turbine MCR (%): 32.90%

HENDRINA POWER STATION Approximately 40km south of Middelburg in Mpumalanga	Tel: 013 296 3499	Mpumalanga	<ul style="list-style-type: none"> • Ten 200MW units Installed • capacity: 2 000 MW • 2001 capacity: 1 900 MW • Design efficiency at rated turbine MCR (%): 34.20% • Ramp rate: 33.33% per hour
KENDAL POWER STATION Approximately 40km southwest of Witbank in Mpumalanga	Tel: 013 647 9111	Mpumalanga	<ul style="list-style-type: none"> • Six 686MW units • Installed capacity: 4 116 MW • 2001 capacity: 3 840MW (sent out capacity) • Design efficiency at rated turbine MCR (%): 35.30% • Ramp rate: 16.67% per hour (15MW per minute)
KOMATI POWER STATION Komati is situated about 37km from Middelburg, 43km from Bethal and 40km from Witbank, via Vandyksdrift.	Tel: 081 663 2094	Mpumalanga	<ul style="list-style-type: none"> • Komati was one of the first pulverised fuel firing stations and designed to generate 1000 MW with five units rated at 100 MW and four at 125 MW • Five 100 MW Units • Four 125 MW Units • Installed capacity: 1000 MW • Design efficiency of rated turbine MCR (%): 30.00%
KRIEL POWER STATION Between the towns of Kriel and Ogies in Mpumalanga	Tel: 017 615 2000	Mpumalanga	<ul style="list-style-type: none"> • Six Units: Each generate 500 MW • Installed capacity: 2 850 MW • Ramp Rate per hour: 30 MW • Average availability over last 3 years: 76.8% • Design efficiency at rated turbine MCR (%):34.99% • Average production over last 3 years: 17 880 GWh
KUSILE POWER STATION The Kusile power station project, which is located near the existing Kendal power station, in the Nkangala district of Mpumalanga,	Tel: 064 034 3774	Mpumalanga	<ul style="list-style-type: none"> • It will comprise six units, each rated at an 800 MW installed capacity for a total capacity of 4 800 MW. Once completed, Kusile will be the fourth-largest coal-fired power station in the world. • The Kusile project will include a power station precinct, power station buildings, administrative buildings (control buildings and buildings for medical and security purposes), roads and a high-voltage yard.
LETHABO POWER STATION Between Vereeniging and Sasolburg in the Free State	Tel: 016 457 5111	Free State	<ul style="list-style-type: none"> • The station comprises of six 618 MW Production Units. A Production Unit consists of one boiler, a turbine and generator. • Power is produced at 20 kV and at 13.5 kA and sent to a step-up transformer where the voltage is increased to 275 kV for efficient transmission.

MAJUBA POWER STATION Between Volksrust and Amersfoort in Mpumalanga	Tel: 017 799 3111	Mpumalanga	<ul style="list-style-type: none"> • Majuba is Eskom's second largest power plant with an installed capacity of 4 110 MW • Units 1-3 capacity: 657 MW per unit • Units 4-6 capacity: 712 MW per unit •
MATIMBA POWER STATION The station is situated close in Lephalale in the Limpopo Province	Tel: 014 763 8911	Limpopo	<ul style="list-style-type: none"> • Six 665MW units • Installed capacity: 3 990 MW • 2001 capacity: 3 690 MW • Design efficiency at rated turbine MCR (%): 35.60% • Ramp rate: 28.57% per hour • Average availability over last 3 years: 93.67% • Average production over last 3 years: 23 789 GWh
MATLA POWER STATION Approximately 30km from Secunda in Mpumalanga	Tel: 017 612 9111	Mpumalanga	<ul style="list-style-type: none"> • Six 600 MW units • Installed capacity: 3 600 MW • 2001 capacity: 3 450 MW • Design efficiency at rated turbine MCR (%): 37.60% • Ramp rate: 25.00% per hour • Average availability over last 3 years: 93.84% • Average production over last 3 years: 25 199 GWh
MEDUPI POWER STATION Located west of Lephalale, Limpopo Province	Tel: 014 763 6416	Limpopo	<ul style="list-style-type: none"> • The Medupi Power Station Project is a green-fields coal-fired power plant. • The power plant has six units that together generate 4.8 GW.
TUTUKA POWER STATION Between Standerton and Bethal, approximately 25 km from Standerton in Mpumalanga.	Tel: 017 749 9111	Mpumalanga	<ul style="list-style-type: none"> • Tutuka consists of six 609MW units at an installed capacity of 3 654MW. • Six 609MW units • Installed capacity: 3 654 MW • 2001 capacity: 3 510 MW • Design efficiency at rated turbine MCR (%): 38.00% • Ramp rate: 33.33% per hour • Average availability over last 3 years: 79,48% • Average production over last 3 years: 19 764 GWh

3.2 OTHER COAL BENEFICIATORS (ELECTRICITY GENERATION)

COMPANY NAME	PROVINCE	NATURE OF BUSINESS	PRODUCT DESCRIPTION
<p>SASOL, SASOLBURG AND EKANDUSTRIA OPERATION</p> <p>Physical Address: 1 Klasie Havenga Road</p> <p>Postal address: P .O. Box 1 Sasolburg Free state</p>	Free State	Coal Beneficiation	Electricity Generation

3.3 ESKOM NUCLEAR POWER STATION (URANIUM BENEFICIATORS)

COMPANY NAME	CONTACT DETAILS	PROVINCE	TECHNICAL DETAILS
<p>KOEBERG NUCLEAR POWER STATION</p> <p>It is situated at Duynefontein, 27km north of Cape Town on the Atlantic coast</p>	<p>Switchboard Tel: 021 550 4911</p>	Western Cape	<ul style="list-style-type: none"> • The steam generated by the steam generators drives a set of turbines. • The steam drives one high-pressure steam turbine and three low pressure turbines at the rate of 1800 rpm. • The turbines are connected to a generator. Each generator can produce a maximum of 920 MW of electricity. • The combined output of Koeberg's two units (1840 MW) is enough to supply the whole of the Western Cape with electricity in summer.

3.4 ESKOM PEAKING POWER STATIONS

The term peaking means they can react quickly to changes in demand and provide power to supplement that generated by base-load stations, which are coal and nuclear. There are fourteen peaking power stations: gas turbine stations, hydroelectric (run-of-river), hydro pumped storage and wind with a total nominal capacity of 5 894.4MW's.

COMPANY NAME	CONTACT DETAILS	PROVINCE	TECHNICAL DETAILS
ACACIA POWER STATION	Tel: 021 558 7266	Western Cape	<ul style="list-style-type: none"> Acacia consists of three 57 MW gas turbine generators, The gas turbines run on kerosene and each unit consumes 5, 7 litre/second at a base load of 57 MW. Fuel is pumped to the site from bulk storage tanks through pipelines.
ANKERLIG POWER STATION	Tel: 021 573 6000	Western Cape	<ul style="list-style-type: none"> The total installed capacity is 1 327 MW. The Open Cycle Gas Turbine (OCGT) units are powered by Fuel oil (Diesel). They are intended to supply electricity into the National Grid during peak hours and emergency situations.
DRAKENSBERG PUMPED STORAGE SCHEME	Tel: 036 438 2088/9	Kwazulu-Natal	<ul style="list-style-type: none"> The four reversible pump turbines, situated 156 metres below ground level, generate 1 000 MW (4 x 250MW) of electricity for the Eskom National Grid during peak periods.
GARIEP HYDROELECTRIC POWER STATION	Tel: 051 754 0400/1	Situated on the border of the Eastern Cap, Free State and the Northern Cape	<ul style="list-style-type: none"> Gariep Dam has a total storage capacity of approximately 5,340,000 megalitres (5,340 hm³). The dam crest is some 1300m sea level. Up to 220 000 litres (220 ton) of water per second flow through the penstock, which have an internal diameter of 7m The station houses four vertical 'Francis' generators with a capacity of 90 MW each – enough to power 70 000 households

GOURIKWA POWER STATION	Tel: 021 573 6000	Western Cape	<ul style="list-style-type: none"> Construction of the first phase commenced in January 2006 and comprised of 3 x 148 MW units which was completed and handed over for commercial operation by June 2007. The second phase comprising of 2 x 148 MW units was declared commercial during November 2008. The total installed capacity is 740 MW.
INGULA PUMPED STORAGE SCHEME	Tel: 036 342 3236	KwaZulu-Natal	<ul style="list-style-type: none"> The Ingula pumped storage scheme consists of an upper and a lower dam, each capable of holding approximately 22 million cubic metres of water. The dams, 4.6km apart, are connected by underground waterways passing through a subterranean powerhouse with four 333 MW generators.
PALMIET PUMPED STORAGE SCHEME	Tel: 021 859 2690	Western Cape	<ul style="list-style-type: none"> Palmiet consists of two 200 MW units at an installed capacity of 400MW and was fully commissioned in 1988..
PORT REX POWER STATION	Tel: 066 003 6790	Eastern Cape	<ul style="list-style-type: none"> Port Rex has three 57 MW gas turbine generators, which are driven by engines similar to those of a Boeing 707 aircraft. They were commissioned in 1976.
SERE WIND FARM		Western Cape	<ul style="list-style-type: none"> It consists of 46 wind turbines, each with a capacity to produce 2.3 MW. Full commercial operation of the project was achieved at the end of March 2015. Sere is Eskom's first large-scale renewable energy project and demonstrates the utility's commitment to reducing its carbon footprint and to investing in a sustainable energy future.

VANDERKLOOF POWER STATION	Tel: 053 6664 0002	Situated on the border of the Eastern Cape and Free State; and the Northern Cape provinces	<ul style="list-style-type: none"> • It is a hydropower station • Full Load Station Capacity 240 MW
NON-DISPATCHABLE HYDROS: FIRST FALLS 6MW SECOND FALLS 11MW MBASHE 42MW NCORA 2.4MW		Eastern Cape	<ul style="list-style-type: none"> • These hydroelectric power stations are situated in the former Transkei and Ciskei. While primarily peaking stations, they also operate as base load when water is available. These non-dispatchable power stations generate electricity but cannot be turned on or off in order to meet societies fluctuating electricity needs. • First Falls 6 MW • This is a run-of-river hydroelectric power station on the Umtata River, commissioned in 1979. It has two 3 MW units. • Second Falls 11 MW • Downstream of First Falls, Second Falls is also a run-of-river hydroelectric scheme with two 5,5 MW units commissioned in 1979. During the dry season the flow to the two stations is augmented by releases from Umtata Dam, situated some 5km north –west of Umtata in the Eastern Cape. • Mbashe 42 MW • This run-of-river hydroelectric station on the Mbashe River in the Eastern Cape has three 14 MW machines commissioned in 1985. Make up water for this station is released from the Ncora Dam via the small Ncora hydro station. • Ncora 2.4 MW • This small hydro station in the Ncora River has three units with a total installed capacity 2 MW and was commissioned in 1983.

3.5 COAL-RELATED PRODUCTS

COMPANY NAME	WEBSITE	PROVINCE	NATURE OF BUSINESS	PRODUCT
<p>SASOL SECUNDA OPERATIONS Physical Address: PdP Kruger Street Secunda Mpumalanga</p> <p>Postal Address: Private Bag x 1000 Secunda 2302</p>	<p>Website: https://products.sasol.com/pic/products/home/index.html</p>	Mpumalanga, Secunda	<p>Sasol Secunda Operations uses coal (converted to synthetic gas) and natural gas through proprietary technologies and processes</p> <p>Manufacture of coal-to-liquids Fischer-Tropsch products</p> <p>Even further processing produces numerous additional products.</p>	<p>The main products Sasol produces are: fuel components, chemical components and co-products</p> <p>From these main products and further value-adding processes Sasol deliver diesel, petrol (gasoline), naphtha, kerosene (jet fuel), liquid petroleum gas (LPG), olefins, alcohols, polymers, solvents, surfactants, co-monomers, ammonia, methanol, crude tar acids, sulphur, fertilisers, illuminating paraffin, bitumen and fuel oil.</p>

SECTION 4

PRECIOUS METALS AND MINERALS BENEFICIATORS

4.1 DIAMOND DEALERS AND BENEFICIATORS

COMPANY NAME	CONTACT DETAILS	PROVINCE	NATURE OF BUSINESS	PRODUCT
